

Master Planned Community

Spread over 5,5 million m², Akoya Oxygen will include residential Villas & Apartments as well as 5 star hotel and serviced apartments surrounding a championship golf course.

Over 8500 individual Mansions, villas and 2500 apartments with access to world-class retail and leisure spaces, the region's first rainforest, plus the Tiger Woods designed Trump International Championship-standard golf course.

This oasis in the desert will be the central point for all new development in the region, specifically how to provide a community with its own individuality.

David Rebello and the Team delivered the overall Client project management, budgeting & cost planning, contract administration & master planning with authority approvals.
